1. Introduction (UKG)

Within the IF4TM project, six Creativity Centers at the universities in Serbia that are partners in the project have been established (University of Kragujevac, University of Belgrade, University of Novi Sad, University of Niš, State University of Novi Pazar and Belgrade Metropolitan University).

The vision of the Creativity Centers is to foster the creativity and innovation of young people, students and talented pupils, and in that way contribute to the creation of an environment in which they can realize their greatest entrepreneurial and innovation potential.

What Creativity Centers distinguish from others is an innovative approach to work with students, an environment that fosters creative thinking, the development of ideas through teamwork, as well as the development of innovations and entrepreneurial ventures. Space and modern 3D equipment for implementing the concept "from idea to market" are provided also. The organization start-up trainings, workshops, Open innovation campaigns with companies, Competitions for the best student idea, student volunteering, networking and the similar are just some of the activities that are being implemented in the centers.

Within the majority of Creative Centers there is also a 3D workshop space, where students can test their ideas for product development and creative solutions, using 3D printers/pens for rapid prototyping, 3D scanners for digitalization, accompanying software and other computer and video equipment. The advantage of the centers is that they are available to all university students and that the students volunteers are involved in organizing the work of the center.

This report summarizes the most important activities and events organized in six Creative Centers within the IF4TM project.
